Education

Indian Institute of Information Technology, Dharwad , BTech in Computer Science	Nov 2023 – May 2027
• GPA: 8.02	
Narayan College, Kanuru State Board of Andhra Pradesh	July 2021 - June 2023
• Percentage: 95	
Dr. KKR Gowtham International School CBSE	July 2018 – May 2021
• Percentage: 85.4	

Technologies

Programming Languages: JavaScript, TypeScript, Python, Java, C++ , C, SQL, HTML5, CSS3
Frontend Development: React.js, Next.js, React Native, Vue.js, Tailwind CSS, Styled Components, Material-UI, Expo
Backend Development and APIs: Node.js, Express.js, Django, Flask, FastAPI, GraphQL, REST APIs, WebSocket
Databases and ORMs: PostgreSQL, MySQL, MongoDB, Firebase, Supabase, Redis, Elasticsearch, Prisma, Drizzle ORM
Cloud and DevOps: AWS, Vercel, Netlify, Docker, Git, GitHub Actions, CI/CD
Machine Learning: scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib, Plotly, Streamlit
Tools and Platforms: Turbo Repo, NextAuth.js, Apache Hive, Postman, VS Code, Linux/Unix

Experience

Web Developer , Google Developer Student Club (GDSC), IIIT Dharwad	Aug 2024 – Present
• Developed and maintained web applications for student events and workshops using React.js and Node.js	
• Collaborated with design team to implement responsive UI/UX components improving user engagement by 40%	
• Mentored junior developers in modern web technologies and best practices	
Member , Career Guidance Cell, IIIT Dharwad	Jan 2024 – Present
• Organized career counseling sessions and workshops for students on industry trends and placement preparation	
• Developed web-based resources and tools to help students track their career progress	
• Coordinated with industry professionals for guest lectures and mentorship programs	

Projects

Geolocation-Based Attendance System
• Developed a React Native mobile application with real-time chat functionality for location-based attendance tracking
• Integrated Supabase for backend services, Firebase for real-time messaging, and Expo Location API for precise geolocation
• Implemented secure authentication and role-based access control for students and faculty
• Achieved 95% accuracy in location verification within a 50-meter radius using GPS coordinates
Enterprise E-Commerce Platform
• Built a full-stack e-commerce platform using Next.js with server-side rendering for improved SEO and performance
• Implemented Prisma ORM for efficient database operations and NextAuth.js for secure user authentication

- Integrated comprehensive analytics dashboard tracking user behavior, sales metrics, and inventory management
- Deployed with Vercel achieving 99.9% uptime and sub-200ms response times

ML-Based Solar Power Prediction System

- Developed a machine learning model using Python and scikit-learn to predict solar power output with 92% accuracy
- Integrated real-time weather API data (temperature, humidity, solar irradiance) for dynamic power forecasting
- Created interactive data visualizations using Plotly and Streamlit for stakeholder reporting
- Optimized energy distribution algorithms reducing operational costs by 15% for renewable energy providers

Social Media Platform with Turbo Repo

- Architected a scalable social media platform using Turbo Repo for efficient monorepo management
- Implemented microservices architecture with separate web app, mobile app, and shared UI components
- Built real-time messaging, post feeds, and notification systems using WebSocket connections
- Utilized TypeScript, React, React Native, and shared component libraries for consistent user experience

Achievements

Hack to Impact 2024: Secured Top 6 position among 500+ teams at IIIT Delhi's flagship hackathon

Competitive Programming: CodeChef rating: 1253 (3-star), LeetCode: 400+ problems solved with focus on algorithms and data structures

Academic Excellence: Maintained consistent academic performance with 8.02 GPA and 95% in intermediate education
